Release Abatement Measure Completion Report

New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity

70 Hathaway Boulevard
New Bedford, Massachusetts

Release Tracking Number (RTN) 4-15685

TRC Project Number: 115058

November, 2010

TRC Environmental Corporation (TRC) prepared this Release Abatement Measure Completion Report (RAM Completion Report) for the Massachusetts Department of Environmental Protection (MassDEP) on behalf of the City of New Bedford (City) per 310 CMR 40.0440 of the Massachusetts Contingency Plan (MCP). This RAM Completion Report addresses the construction activities that have been undertaken by the City at the New Andrea McCoy Field (former Keith Junior High School [KJHS]). The New Andrea McCoy Field (the "Site") is located to the south-southwest of the intersection of Hunter Street and Parker Street in New Bedford, Massachusetts (see Figure 1). The construction activities described in the RAM Plan submitted to MassDEP on April 13, 2009 included the following:

- Excavation of soil during Site construction activities;
- Excavation of soil in targeted areas to reduce risk posed by impacted soil/fill;
- Temporary soil stockpiling and stockpile management;
- Offsite reuse, recycling or disposal of impacted soils excavated to reduce risk and management of unimpacted soil displaced by Site construction and grading activity;
- Onsite reuse of soil suitable for such application;
- Replacing the excavated soil, where necessary, with appropriately documented unimpacted fill material screened in advance by laboratory analysis; and
- Onsite groundwater management where dewatering is required for construction and/or risk-reduction related excavation activity.

Two Release Tracking Numbers (RTNs) affect the former KJHS property:

- RTN 4-15685
- RTN 4-15824

RTN 4-15685 is associated with the Parker Street Waste Site (PSWS), including the New Andrea McCoy Field (former KJHS) Site. RTN 4-15824 is associated with the former KJHS underground storage tank (UST) release that triggered a 72-hour regulatory reporting obligation to the MassDEP per 310 CMR 40.0332(2) that was reported to the MassDEP by Vanasse Hangen Brustlin, Incorporated (VHB) of Watertown, Massachusetts on behalf of the City on October 13, 2000. MassDEP approved Immediate Response Action (IRA) assessment activities at that time and assigned RTN 4-15824. The VHB-initiated IRA activities were subsequently closed out with a Class A-1 Response Action Outcome (RAO) statement as described herein. Special Project Status that includes both RTNs has been established for the PSWS. As previously noted, the RAM Plan to address construction activities was filed under RTN 4-15685.

This RAM Completion Report is organized as follows:

- Section I (Background) briefly summarizes information on prior environmental activities, TRC's involvement with the Site, the circumstances of the release, and activities described in prior RAM Status Reports; it also describes the RAO Statement Report associated with the former UST and the objectives of this RAM Completion Report;

- Section II (RAM Completion Report) provides the information required for a RAM Completion Report under the MCP, specifically 310 CMR 40.0446;

- Section III (References) lists information sources relied upon in the preparation of this RAM Completion Report; and

- Appendices are provided for supporting information including a photograph log (Appendix A), copies of Material Shipping Record (MSR) forms associated with "like-site" soil management (Appendix B), and a copy of the June 26, 2009 letter to MassDEP outlining the "like-site" soil management approach for unimpacted soils (Appendix C).

I. BACKGROUND

Prior Investigations Conducted by Others

In November 2000, VHB conducted an IRA in response to a leaking UST on the KJHS property. Based on a UST tightness test, VHB determined that the leak had occurred from a prior UST (replaced in 1990). The results of soil and groundwater samples collected by VHB indicated no conditions requiring an IRA were present. Refer to Table 1 in TRC's RAM Plan submitted on April 13, 2009 for a summary of historical soil analytical data that includes the results of the VHB work (TRC, 2009a). The City subsequently submitted a Special Project Application for RTN 4-15685, which included the UST release reported under RTN 4-15824.

Follow-up work by VHB in February 2002 concluded that soil impacts were within background levels typically observed in urban areas at the time of the investigation. An IRA Completion Statement was submitted to MassDEP on February 19, 2002.

In April 2006, BETA Group, Incorporated (BETA) of Norwood, Massachusetts conducted soil sampling at the Site to supplement the February 2002 VHB data. A total of 12 soil borings were advanced and seven surface soil samples were collected (0-0.5 feet below grade). Of the 12 soil borings, only four indicated the presence of fill material. Soil samples were collected and analyzed for polychlorinated biphenyls (PCBs), Resource Conservation and Recovery Act (RCRA) 8 metals and polyaromatic hydrocarbons (PAHs) from soil borings where fill material was encountered. A subset of soil samples were also analyzed for semi volatile organic compounds (SVOCs). Compounds that exceeded MCP Method 1 S-1 soil standards included arsenic, cadmium, lead, and benzo (a) pyrene. BETA concluded that only cadmium exceeded MassDEP MCP background concentrations and that the other metals and PAH concentrations were consistent with background concentrations. (MassDEP, 2002).

Supplemental Sampling Conducted by TRC

TRC conducted additional soil testing on November 14, 2008 to evaluate potential residual soil impacts near the former UST (removed on January 25, 2008) and to further evaluate VHB's surface soil lead detections. TRC collected additional data using current MassDEP petroleum hydrocarbon methods and total lead analysis, and evaluated if residual soil impacts were present that warranted further remedial action.

TRC implemented soil boring activities on November 14, 2008. TRC utilized New England Geotech (NEG) of Jamestown, Rhode Island, to perform drilling activities at the Site under TRC field supervision. The borings were advanced using Geoprobe® direct push methods. The samples were visually examined in the field for evidence of petroleum impacts and field screened using the MassDEP jar headspace methodology and a photoionization detector (PID). Samples were collected from each boring at various depths to delineate the extent of potential impacts. The analytical data collected by TRC from this field effort are summarized in Table 2 of TRC's RAM Plan submitted to MassDEP on April 13, 2009. Groundwater sampling was not conducted at this time since no impacted soil was detected below the bottom elevation of the UST (background headspace readings were observed at depths screened below the bottom elevation of the UST).

TRC Consultation and Sampling Supporting Redevelopment

In January 2009, TRC met with representatives of the City and Mount Vernon Group Architects (MVG) concerning a proposed redevelopment of the former KJHS property as an outdoor athletic complex with a support building for showers, lockers, concessions, etc., parking lot expansion, and associated storm water infrastructure improvements.

TRC recommended the preparation of a RAM Plan to address the construction work on the property and a Utility-Related Abatement Measure (URAM) for the construction of several utilities including a proposed force main storm sewer, which traverses areas beneath the former KJHS property, Hunter Street, Walsh Field, Parker Street and the New Bedford High School (NBHS) property. TRC also recommended pre-characterization to support appropriate soil management planning, which is also detailed in the RAM Plan and associated Soil Management Plan (SMP) submitted to MassDEP on April 13, 2009.

TRC Release Abatement Measure Plan

As noted above, TRC submitted the RAM Plan on April 13, 2009. The RAM Plan was prepared to support construction activities in impacted areas and to support risk reduction through the excavation and removal of impacted soil identified as part of environmental site investigation activities. RAM related excavation area locations are shown on Figure 2.

Work proposed under TRC's RAM Plan included:

- Excavation of soil during construction activities;
- Excavation of soil in targeted areas to reduce risk posed by impacted soil/fill;
- Temporary stockpiling and stockpile management;
- Offsite reuse, recycling or disposal of impacted soils excavated to reduce risk and management of unimpacted soil displaced by Site construction and grading activity;
- Onsite reuse of soil suitable for such application;
- Replacing the excavated soil, where necessary, with appropriately documented unimpacted fill material screened in advance by laboratory analysis; and
- Onsite groundwater management where excavation dewatering is required for construction and/or risk-reduction related excavation activity.

Please refer to the April 13, 2009 RAM Plan for additional details.

Previous TRC Release Abatement Measure Status Reports

TRC submitted an initial RAM Status Report to the MassDEP on August 11, 2009 (TRC, 2009b). The RAM Status Report presented new site information and detailed the status of construction activities in impacted and potentially impacted areas implemented since the RAM Plan was filed.

The activities detailed in the August 11, 2009 RAM Report included:

- Advancing of additional shallow soil borings and supplemental data collection to confirm the extents of potential soil impacts around Areas 1, 2, 3 and 5;
- Temporary soil stockpiling and stockpile management, including segregation and stockpiling of material for onsite reuse (Area 6 and Area 7) and offsite reuse, recycling and/or disposal (Areas 1 through 5);
- Excavation and disposal of impacted soil/fill from several areas, including excavation and removal of approximately 2,448 tons of impacted soil;
- Onsite soil stabilization treatment of lead impacted soil stockpiles from Areas 1, 2, 3 and 5 prior to offsite disposal;

- Characterization of backfill materials by David W. White & Son's (City's construction contractor [DW White]) environmental subcontractor JM Environmental Corporation (JME);
- Implementation of "like-site" soil management approach for an estimated 40,000 cubic yards of excess unimpacted soil material; and
- Environmental monitoring activities, including fugitive dust and work zone volatile organic compound (VOC) monitoring.

Please refer to the August 11, 2009 RAM Status Report for additional details.

TRC submitted an additional RAM Status Report to the MassDEP on February 11, 2010 (TRC, 2010a), which presented new site information and detailed the status of construction activities undertaken during the reporting period following the August 11, 2009 submittal.

The activities detailed in the February 11, 2010 RAM Status Report included:

- Installation of field lighting towers and associated management of displaced material;
- Excavation and associated soil management from the horizontal directionally drilled force main storm sewer installation as referenced in the April 13, 2009 RAM (these activities are detailed in TRC's January 15, 2010 [TRC, 2010b] and July 15, 2010 [TRC, 2010c] URAM Status Reports and October 12, 2010 URAM Completion Report [TRC, 2010d]);
- Demolition of existing sidewalk and curbing along the west side of Hunter Street;
- Excavation and associated soil management in advance of installation of fence footings within the northwestern portion of the Site;
- Installation of parking lot lighting piers;
- Submittal of final BOL and Material Shipping Record (MSR) paperwork associated with disposal of material from targeted excavation areas;
- Supplemental data collection in September and November 2009 in the vicinity of a new precast concrete transformer vault in the northwestern portion of the Site;
- Continued implementation of "like-site" soil management approach for an estimated 40,000 cubic yards of excess unimpacted soil material; and
- Environmental monitoring activities, including fugitive dust and work zone VOC monitoring.

Please refer to the February 11, 2010 RAM Status Report for additional details.

TRC submitted a final RAM Status Report to the MassDEP on August 11, 2010 (TRC, 2010e), which presented significant new site information and detailed the status of construction activities undertaken during the reporting period following the February 11, 2010 submittal.

The activities detailed in the August 11, 2010 RAM Status Report included:

- Installation of an approximately 15-foot section of storm drain sewer pipe in the northeastern portion of the Site (eastern portion of the parking lot) as described in URAM Status Report submitted to MassDEP on July 15, 2010 (TRC, 2010c);
- Installation of a meter pedestal in association with construction of the transformer vault (as required by NSTAR Electric) and as described in URAM Status Report submitted to MassDEP on July 15, 2010 (TRC, 2010c);
- Excavation and associated soil management during installation of a storm water runoff leaching chamber adjacent to Hunter Street within the eastern portion of the Site;
- Submittal of final BOL paperwork associated with disposal of material from targeted excavation areas;
- Completion of implementation of "like-site" soil management approach for an estimated 40,000 cubic yards of excess unimpacted soil material; and
- Environmental monitoring activities, including fugitive dust and work zone VOC monitoring.

Please refer to the August 11, 2010 RAM Status Report for additional details.

Former Keith Junior High School UST Response Action Outcome

On June 28, 2010, TRC submitted a RAO to the MassDEP on behalf of the City documenting the completion of activities taken to address soil impacts associated with the former UST tracked under RTN 4-15824. A Class A-1 RAO was achieved at the Site for RTN 4-15824, based on and in accordance with, the following (310 CMR 40.1035 & 40.1036(1)):

- The source of soil impacts (including RAM Plan Area 4) has been eliminated;
- A Permanent Solution has been achieved; and
- The soil impacts have been reduced below MCP Method 1 S-1 soil cleanup standards and background levels.

Please refer to TRC's RAO Statement Report (TRC, 2010f) for a detailed description of the completion of response actions associated with RTN 4-15824.

The RAM Completion Report is provided in the following Section II.

II. RELEASE ABATEMENT MEASURE COMPLETION REPORT (310 CMR 40.0446)

This RAM Completion Report is organized according to the information needs set forth under 310 CMR 40.0446(4)(a) through (f) of the MCP.

(a) Description of Release or threat of Release, Site Conditions, and Surrounding Receptors

a. Release Description

As described previously, MassDEP tracks two separate releases at the New McCoy/Former KJHS property. RTN 4-15685 is associated with historical fill material, while RTN 4-15824 tracks a petroleum impact associated with a UST that is no longer onsite. The RAM Plan was filed under RTN 4-15685. A Class A-1 RAO was achieved at the Site for RTN 4-15824 and was submitted to MassDEP on June 28, 2010 (TRC, 2010f). PCBs, PAHs, extractable petroleum hydrocarbons (EPH), TPH, volatile petroleum hydrocarbons (VPH) and several metals have been detected in soil samples collected from the Site. A detailed release description is provided in the RAM Plan submitted to MassDEP on April 13, 2009 (TRC, 2009a).

b. Site Conditions

The New Andrea McCoy Field (former KJHS) Site is located between Hathaway Boulevard and Hunter Street, and east of the intersection of Hathaway Boulevard and Summit Street in New Bedford, Massachusetts (Figure 1). The Site is bordered on the western and eastern sides by Hathaway Boulevard and Hunter Street, respectively. Residential properties border both the northern and southern sides, as well as across Hathaway Boulevard to the west.

The Site was previously occupied by the former KJHS. The Site currently contains the New Andrea McCoy Field athletic complex, including turf field, track, tennis courts, discus ring, landscaped areas and parking lot. The proposed support building for showers, lockers, concessions, etc. has yet to be constructed. The parking lot gently slopes from west to east across the northern portion of the Site. A swale is currently present south of the parking lot to accommodate the future construction of the proposed support building. The southern portion of the Site is comprised of engineered tiers containing the athletic fields. The upper tier, located in the southwestern portion of the Site, contains the turf field, surrounding track and spectator seating. A retaining wall bisects the Site from north to south along the eastern edge of the track. The southeastern portion of the Site (lower tier) contains the tennis courts and discus circle. The fuel oil UST that served the former KJHS building has been removed from the Site.

c. Surrounding Receptors

The Site lies within 500 feet of residential dwellings and an outdoor athletic complex (Walsh Field). The baseball field portion of Walsh Field is used for practices and games during the spring and summer baseball season (i.e., high school, local leagues, and Cape Cod League).

Soccer, softball, football as well as track and field events/practices also take place at Walsh Field.

Groundwater categories at the Site include actual or potential GW-2, depending upon proximity to occupied structures (groundwater is expected to be less than 15 feet below ground surface based on data collected by TRC and others at this property), and GW-3, which applies to all groundwater throughout the Commonwealth. However, groundwater impacts are not expected at the Site based on previous analytical data. For example, groundwater monitoring conducted on a total (unfiltered) basis in January 2009 in two onsite monitoring wells did not detect analytes above MCP groundwater cleanup standards or MCP Reportable Concentrations (RCs) for groundwater.

Based on review of on-line MassDEP Priority Resource Map data available from Massachusetts Geographic Information System (MassGIS), the Site is not located within a Current or Potential Drinking Water Source Area (MassGIS, 2008).

The Site is not located in a wetland resource area. No other documented sensitive ecological receptor areas (e.g., Areas of Critical Environmental Concern [ACECs]) are known to be located at or near the site. No municipal or residential wells are known to be in the area.

(b) Description of the RAM completed at the Site

All activities included in the RAM Plan submitted to MassDEP on April 13, 2009 have been completed, including the following:

- Excavation of soil during construction activities;
- Excavation of soil in targeted areas to reduce risk posed by impacted soil/fill.
- Temporary stockpiling and stockpile management;
- Offsite reuse, recycling or disposal of impacted soils excavated to reduce risk and management of unimpacted soil displaced by Site construction and grading activity;
- Onsite reuse of soil suitable for such application;
- Replacing the excavated soil, where necessary, with appropriately documented unimpacted fill material screened in advance by laboratory analysis; and
- On-site groundwater management where excavation dewatering is required for construction and/or risk-reduction related excavation activity.

A photograph log depicting various RAM-related activities is included as Appendix A.

Descriptions of RAM activities conducted prior to the publication of this RAM Completion Report are provided in Section I (Background) and in the following previously submitted documents, which are included herein by reference:

- *Release Abatement Measure Plan, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* April 2009.

- *Release Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* August 2009.

- *Utility-Related Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School), 70 Hathaway Boulevard, New Bedford, Massachusetts.* January 2010.

- *Release Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* February 2010.

- *Response Action Outcome Statement Report, Former Keith Junior High School UST, 70 Hathaway Boulevard, New Bedford, Massachusetts.* June 2010.

- *Utility-Related Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School), 70 Hathaway Boulevard, New Bedford, Massachusetts.* July 2010.

- *Release Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* August 2010.

- *Utility-Related Abatement Measure Completion Report, New Andrea McCoy Field (Former Keith Junior High School), 70 Hathaway Boulevard, New Bedford, Massachusetts.* October 2010.

Following submittal of the previous RAM Status Report to MassDEP on August 11, 2010, TRC received confirmation that the City's construction contractor (DW White) had completed construction activities at the Site. In addition, final MSR documents related to the implementation of the "like-site" soil management approach were provided to the City. The "like-site" soil shipments are described below and copies of the final MSR documents are included as Appendix B.

(c) Investigatory and Monitoring Activities

Investigatory activities were, in large part, performed in advanced of RAM activities. However, supplemental investigatory activities were performed during implementation of the RAM to delineate the extents of potential soil impacts around Areas 1, 2, 3 and 5 and in association with the installation of the precast concrete transformer vault in the northwestern portion of the Site. Detailed descriptions of these investigations are provided in the following documents:

- *Release Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* August 2009.

- *Release Abatement Measure Status Report, New Andrea McCoy Field (Former Keith Junior High School) Soil Removal in Support of Risk Reduction and Construction Activity, 70 Hathaway Boulevard, New Bedford, Massachusetts.* February 2010.

Monitoring activities were conducted during the execution of the RAM, as described herein.

Active dust suppression was employed (as needed) during RAM related soil excavation and management activities using hoses. In addition, dust levels were monitored using TSI Dustrak™ air particulate monitors as described in Section 6 of the RAM Plan submitted to MassDEP on April 13, 2009. The TSI Dustrak™ units were equipped with size-selective inlets for particles of 10 micrometers in diameter or less (PM_{10}). This instrumentation has an accuracy of 0.001 mg/m^3 (1 ug/m^3). Background samples were collected for at least 15 minutes at each location prior to the start of daily activities. The dust monitoring instruments were placed in weatherproof cases with an omni-directional probe to minimize wind interference. The dust monitoring instruments were zeroed daily before use and at the end of the day. Data was logged at 60-second intervals and data was downloaded and reviewed daily. The TSI Dustrak™ units were also periodically checked by field personnel during RAM-related activities.

Due to a possible malfunction, dust monitoring was not automatically recorded on June 1, 2009. Field data was manually recorded by the TRC field geologist in response to the malfunction as described in the RAM Status Report submitted on August 10, 2009. Dust monitoring was not conducted during the fence footing and parking lot lighting pier installation as described in the RAM Status Report submitted on February 11, 2010. TRC responded immediately to the discovery of potentially impacted soils during the fence footing installation activities. Although dust monitoring equipment was not available, TRC provided oversight and allowed excavation activities to continue due to the moist Site conditions (low potential for fugitive dust generation) and the minimal amount of potentially impacted soil being disturbed. No visual signs of fugitive dust were noted during this activity. The City and TRC were not provided advance notice of the parking lot lighting pier activities by DW White, thus no monitoring occurred. However, it should be noted that the disturbance of potentially impacted soils was minimal during this work and potentially impacted soils that were encountered were managed appropriately (staged on and covered with polyethylene sheeting pending offsite disposal).

No sustained (a sustained reading would consist of a reading lasting 15 minutes or longer) ambient dust levels exceeding the EPA 24 hour National Ambient Air Quality Standard (NAAQS) of 0.150 mg/m^3 at a downwind monitoring location were detected during implementation of the RAM Plan. Descriptions of dust monitoring results, summaries, and all Dustrak™ data files and field forms have been included in TRC's three previously submitted RAM Status Reports.

Based on previous data collected at the Site, significant VOC emissions were not expected during implementation of RAM Plan activities. However, field monitoring of the breathing zone

was conducted as a precaution during RAM related activities using a PID. Excavated soils were also screened for the presence of VOCs using the PID. No VOC concentrations were detected above background during RAM activities.

(d) Findings and Conclusion

The purpose of this RAM Plan was to outline the risk reduction measures undertaken by the City at the New Andrea McCoy Field property (former KJHS) to support construction activities and address soil impacts. The RAM Plan described construction, excavation and soil management, backfilling, groundwater management and environmental monitoring activities associated with the construction of the athletic complex.

With the exception of construction of the proposed support building, construction of the New Andrea McCoy Field athletic complex has been completed. All waste materials generated were disposed of at appropriate facilities (as documented previously and herein). The work set forth in the RAM Plan is complete.

(e) Management of Remediation Waste, Remedial Waste Water, and/or Remedial Additives

Disposal of Impacted Material

As described above and detailed in previous MCP documentation submittals associated with this RAM, impacted soils excavated as part of RAM activities were temporarily stockpiled on polyethylene sheeting and securely covered by same, pending analytical characterization and offsite disposal. Soil stabilization treatment of soil/fill material was implemented, as necessary, prior to offsite disposal. Approximately 2,958 tons of soil/fill material were transported offsite during implementation of the RAM. The disposal facility and tonnage for material associated with various RAM-related excavation activities are summarized herein. Please refer to the February 11, 2010 and August 11, 2010 RAM Status reports for laboratory analytical data and final BOL and MSR documents associated with offsite reuse, recycling and/or disposal of impacted soil/fill material.

As detailed in the August 11, 2009 RAM Status Report, approximately 2,448 tons of soil were excavated as part of RAM risk reduction activities at the Site between May 1, 2009 and June 5, 2009. Excavation area locations are shown on Figure 2. The disposal of material from each of the excavation areas, identified as Area 1 through Area 5, included:

- Approximately 1,868 tons of impacted soils from Areas 1, 2, 3 and 5 were shipped for reuse at the Greenwood Street Landfill in Worcester on May 28 and 29, 2009 as well as on June 1 and 4, 2009.
- Approximately 163 tons of soil and roofing debris from Area 3D were shipped via railcar and disposed of at Sunny Farms Landfill in Fostoria, Ohio on June 1, 2009 via Champion City Recovery in Brockton, Massachusetts.

- Approximately 416 tons of impacted soils from Area 4 were shipped to the Upton Landfill in Capertown, Massachusetts on June 4, 2009.

As described in the February 11, 2010 RAM Status Report, soil/fill material permanently displaced during various RAM-related construction activities was temporarily stockpiled on polyethylene sheeting and securely covered by same, pending analytical characterization for offsite disposal. The material was loaded and transported offsite to the Greenwood Street Landfill between May 3, 2010 and June 3, 2010 and included the following:

- Approximately 246 tons of soil/fill material associated with the installation of lighting towers, parking lot lighting piers, storm drain lines, URAM-related fire and water lines and the precast concrete transformer vault were shipped offsite between May 3, 2010 and May 5, 2010.
- Approximately 264 tons of treated material (select lead impacted soil material underwent onsite stabilization treatment) associated with fence footing installation and URAM-related directional drilling activities and untreated material associated with construction of the leaching chamber were shipped offsite between June 1, 2010 and June 3, 2010.

Please note that a portion of the treated material shipped on June 1, 2010 (approximately 10 cubic yards) was related to URAM activities as detailed in TRC's URAM Status Report submitted to MassDEP on July 15, 2010.

Additional shipments of impacted material are not anticipated at this time. However, select construction activities, specifically the installation of the proposed support building, have yet to be implemented. Should further soil shipments be deemed necessary, those activities will be detailed in a future regulatory submittal specific to those future activities.

Backfill Material Characterization

As detailed in the August 11, 2009 RAM Status Report, on May 29, 2009, JME collected characterization samples of material used as needed to backfill the various onsite excavations. No analytes were detected in excess of the current MCP Method 1 S-1 soil cleanup standards and the results were consistent with MassDEP's natural soil background levels. Please refer to the August 11, 2009 RAM Status Report for further detail regarding the backfill material characterization and a copy of the laboratory analytical data report.

"Like-Site" Soil Management

On June 26, 2009, TRC submitted a letter to MassDEP describing a "like-site" soil management approach in order to facilitate the management of the estimated 40,000 cubic yards of excess unimpacted soil (majority of soil from Area 7) that needed to be managed for earthwork operations to reach final grades for the New Andrea McCoy Field. A copy of the June 26, 2009 letter submitted to MassDEP is provided in Appendix C.

To facilitate the "like-site" soil management approach, JME collected composite samples of both the topsoil material as well as the underlying soil/fill from the cut areas (Area 6 and Area 7) for

PAHs, RCRA 8 metals, and PCB analysis. With the exception of one sample analyzed for PCBs (i.e., Test Pit 6), soil analytical data indicated that PCBs, PAHs and metals were non-detect or below MassDEP identified natural soil background concentrations and/or MCP Method 1 S-1 soil cleanup standards, regardless of groundwater category. As a result, JME used this data set to support "like-site" soil management planning. JME segregated Test Pit 6 soil for reuse at the New Andrea McCoy Field project site only. Please refer to the August 11, 2009 RAM Status Report for a detailed summary of the data collected by JME and associated laboratory data reports.

In accordance with the June 2009 letter, approximately 42,173 cubic yards of excess unimpacted soil were shipped to one of two commercial "like-sites" during implementation of the RAM. All soils were managed using MassDEP MSRs applicable to materials not subject to management under 310 CMR 40.0035 of the MCP, nor manifesting under 310 CMR 30.000. Copies of all completed MSR transactions are provided as Appendix B.

(f) Ongoing Activities

No ongoing activities related to the RAM will be conducted at the Site. General maintenance activities (e.g., cutting of grass, field and turf maintenance, etc.) will be implemented as necessary at the athletic complex by the City.

a. LSP Opinion

The objective of this RAM Completion Report is to apprise MassDEP of the completion of the City's construction activities in areas with potentially impacted soil at the New Andreas McCoy Field (former KJHS) property.

This RAM Completion Report has been prepared in accordance with 310 CMR 40.0446 as set forth in the MCP.

RE: Data in Support of "Like-Site" Soil Management Approach
Former Keith Junior High School/New Andre McCoy Field
New Bedford, Massachusetts

Dear Ms. Cote:

As discussed during our recent (June 5, 2009) teleconference regarding the above-mentioned project location at the former Keith Junior High School (KJHS), TRC Environmental Corporation (TRC) has prepared this letter to summarize and discuss all soil analytical data collected in support of a "like-site" management approach for excess project soil. At the time of the June 5, 2009 teleconference TRC was not in possession of all the soil analytical data, a portion of which was still undergoing analysis at the laboratory. This transmittal provides the complete data set generated to support the "like-site" approach.

Background. The construction contractor (David W. White) for the New Andre McCoy Field at the former KJHS is interested in finding a "like-site" for excess project soil. The Soil and Groundwater Management Plan (SGMP) prepared for the project by TRC indicates the subject soil is eligible for re-use at the KJHS project location. (The SGMP is included as Appendix G in TRC's April 2009 Release Abatement Measure Plan.) Currently, the City of New Bedford's bid specifications require that any excess project soil that would otherwise be eligible for on-site re-use must go off site to a landfill (daily cover/grading) unless otherwise approved by the LSP. David W. White estimates that approximately 40,000 cubic yards of excess soil will need to be managed for earthwork operations to reach proposed final grades for the New Andre McCoy Field.

The part of the site with the largest "cut" is Area 7, which has very little indication of contamination (please see Attachment A for a figure illustrating the location of Area 7), and as discussed during the June 5, 2009 teleconference is outside the footprint of the Parker Street Waste Site (PSWS). It is the soil from this portion of the project that are targeted for "like-site" reuse.

David W. White's environmental subcontractor JM Environmental (JME) has undertaken the following activities to properly manage material known to be impacted and to evaluate "like-site"

suitability of remaining material. JME proposes that any soil deemed eligible for a "like-site" soil management approach would only be used at commercial locations.

- **Segregation.** The following describes soil segregation efforts undertaken by David W. White and JME.

  Polychlorinated Biphenyl (PCB) Impacted Soil. JME reviewed the PCB data collected during previous environmental investigations at the former KJHS from within Areas 6 and 7 that are tabulated in TRC's April 2009 Release Abatement Measure Plan. Based on this review, JME instructed the field crews to segregate these soil areas for onsite re-use. Five PCB results were reported in Areas 6 and 7, which are listed below:

  - SS-5 (0-6") – 0.0541 mg/kg
  - SS-6 (0-6") – 0.0674 mg/kg
  - TP-6 (8-9') – 0.020 mg/kg
  - TP-11 (8-9') – 1.045 mg/kg
  - SB11 (0-6") – 0.90 mg/kg

  Although no PCBs were detected at the KJHS site above Massachusetts Contingency Plan (MCP) Method 1 S-1 soil cleanup standards, no Massachusetts Department of Environmental Protection (MassDEP) identified natural soil background levels has been established for PCBs, thus the making the soils containing detectable concentrations of PCBs problematic for a "like-site" approach under the anti-degradation provisions of the MCP (310 CMR 40.0032(3)).

  The above summarized samples with PCB detections generally fall within close proximity to the delineated site cut-line (see figure in Attachment A). JME removed approximately 25 yards of material from each sample location where PCBs were detected at the depth the sample was collected. This material has been segregated for on-site use at KJHS only and will not be involved in any "like-site" transfer/off-site reuse.

  Metals and Polyaromatic Hydrocarbon (PAH) Impacted Soil. JME reviewed metals and PAH data from Areas 6 and 7 where existing grades will be lowered (cut) and determined that most detections of metals and PAHs were within the topsoil layer (0-1.75') and near the cutline (see figure in Attachment A). JME instructed field crews to remove the topsoil for approximately 30-feet on either side of the cutline to a depth of 2-feet. This material has been segregated for on-site use at KJHS only and will not be involved in any "like-site" transfer/off-site reuse.

- **Additional Data Collection to Support "Like-Site" Approach.** JME performed test pits and collected 26 soil samples in cut Areas 6 and 7 for PAHs, RCRA 8 metals, and PCB analysis from composite samples. JME proposes to use this data set to support "like-site" soil management planning. JME's sample analysis focused on the three broad contaminant groups of issue at the wider site (i.e., metals, PAHs, PCBs). The data collected from this effort are provided in Attachment B. The soil samples were collected from both the topsoil material as well as data from the underlying soil/fill from the cut areas.

- **Data Analysis.** As noted in TRC's e-mail message of May 20, 2009, JME originally proposed that if the data were below the established MassDEP identified natural soil background levels in soil for the particular chemical constituents then no testing would be required at the

potential offsite commercial location. The data collected by JME (and contained in Attachment B) are summarized below:

PCBs. All PCB results are non-detect, with the exception of one sample from Test Pit 6 (see Attachment C for figures illustrating JME's sampling locations). The PCB result from Test Pit 6 was 0.19 mg/kg, which is significantly less than the MCP Method 1 S-1 soil clean-up standards. Nonetheless, since no MassDEP identified natural soil background levels exist for PCBs, JME will segregate Test Pit 6 soil for reuse at the KJHS project site only. Test Pit 6 soil will not be involved in any "like-site" transfer/off-site reuse.

PAHs. Most of the PAH results are non-detect. In the few samples where PAHs detected in project soils targeted for off-site reuse, the concentrations were well below MassDEP identified natural soil background levels.

Metals. Most of the metals detected in the JME dataset were at concentrations below MassDEP identified natural soil background levels. All metals results were well below the most stringent MCP Method 1 S-1 soil cleanup standards, regardless of groundwater category.

- Lead was detected in 23 out of 26 JME soil samples, with detected concentrations ranging from 0.89 to 130 mg/kg (average detected concentration 26.8 mg/kg). The MassDEP identified natural soil background level for lead is 100 mg/kg.
- Several detections of lead and one of silver were reported at concentrations slightly higher than MassDEP identified natural soil background levels (100 mg/kg for lead). However, all metals that were detected (including the lead) were reported at concentrations well below the most stringent Method 1 S-1 soil cleanup standards.
- Silver was detected in one sample at a concentration of 0.9 mg/kg, which is just over the natural soil background of 0.6 mg/kg.
- Both lead and silver were present at concentrations well below their respective Method 1 S-1 soil cleanup standards of 300 mg/kg and 100 mg/kg.

- **Path Forward.** JME is currently evaluating five locations for use of the excess soil. As noted above, JME has stated that the above-described excess soil from this site would only be reused at a commercial site. As discussed during the June 5, 2009 teleconference, the areas of soil involved are to the west of the contaminated fill line delineated by TRC on the KJHS parcel (see Attachment A), are outside the footprint of the Parker Street Waste Site (PSWS), and are not regulated soil (no detections above reporting or cleanup criteria). In addition, the majority of the results are well below MassDEP identified natural soil background levels based on maximum detected values, and all are well below natural soil background based on average concentrations.

  When JME identifies the proposed commercial locations where excess soil from the project is proposed for use, MassDEP will be apprised in writing before soil transfer commences. All soil transfers will be tracked via Material Shipping Records (MSRs). MassDEP will be provided copies of all completed MSR transactions.

In addition, the City will require a written acknowledgement from the owners of the commercial locations to which the soil will be transferred, and from the David W. White explicitly stating the following:

- From the Accepting Facility:

_____ agrees to accept excess project soil from the former Keith Jr. High School/ New Andre McCoy Field site (the Soil) located at _____ Hathaway Boulevard in New Bedford, Massachusetts. _____ agrees that it has received and reviewed the analytical data associated with the Soil. Based on _____'s review of this data, _____ determines that importation of the Soil will not trigger regulatory reporting requirements, is consistent with background levels at the location where reuse will occur, and does not violate applicable Massachusetts Contingency Plan anti-degradation requirements under 310 CMR 40.0032(3). _____ shall use the Soil only as sub-grade fill material and only on commercial sites. _____ shall accept the material via a Materials Shipping Record. _____shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

- From the David W. White (the general contractor):

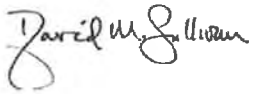
David W. White and Son, Inc. (the Contractor) agrees to manage excess project soil from the Keith Jr. High School/ New Andre McCoy Field site (the Soil) located at _____ Hathaway Boulevard in New Bedford, Massachusetts in accordance with the letter dated June _____, 2009 from TRC (Attachment 1). The Contractor shall comply with all terms and conditions of the letter and any additional terms and conditions imposed by the Massachusetts Department of Environmental Protection (MassDEP) with respect to the management of the Soil. The Contractor agrees that the management of the Soil is at its sole risk and shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

The expeditious removal of the excess soil is important to the success of this project, given the aggressive project schedule agreed to with the City by David W. White. MassDEP will be notified as soon as possible when off-site transport of excess soil is proposed.

Please do not hesitate to contact me at TRC at 978-656-3565 or via e-mail at dsullivan@trcsolutions.com if you have any questions or comments.

Sincerely,

TRC Environmental Corporation



David M. Sullivan, LSP, CHMM
Senior Project Manager

JM Environmental Corp.
Attn: Mr. Charles Wilder
108 Beacon St., 2nd Floor
Worcester, MA 01608

Dear Mr. Wilder:

Joseph Lemieux ("Landowner" of receiving site of 383R Hixville Rd., North Dartmouth, MA) agrees to accept excess project soil from the former Keith Jr. High School/New Andre McCoy Field site (the Soil) located at 70 Hathaway Boulevard in New Bedford, Massachusetts.

Joseph Lemieux agrees that it has received and reviewed the analytical data associated with the Soil. Based on Joseph Lemieux's review of this data, Joseph Lemieux determines that importation of the Soil will not trigger regulatory reporting requirements, is consistent with background levels at the location where reuse will occur, and does not violate applicable Massachusetts Contingency Plan anti-degradation requirements under 310 CMR 40.0032 (3). Joseph Lemieux shall use the soil only as sub-grade fill material and only on commercial sites. Joseph Lemieux shall accept the material via a Materials Shipping Record. Joseph Lemieux shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

Sincerely,

Joseph W Lemieux

Joseph Lemieux,
Diversified Developments

David W. White and Son Inc.

David W. White and Son, Inc. (the Contractor) agrees to manage excess project soil from the Keith Jr. High School/New Andre McCoy Field site (the Soil) located at 70 Hathaway Boulevard in New Bedford, Massachusetts in accordance with the letter dated June 26, 2009 from TRC. The Contractor shall comply with all terms and conditions of the letter and any additional terms and conditions imposed by the Massachusetts Department of Environmental Protection (MassDEP) with respect to the management of the Soil. The Contractor agrees that the management of the Soil is at its sole risk and shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/13/09 — From; 8/13/09 — To
3. U.S. EPA ID number: _____
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Name of organization
Contact name
Title
Street address
City/Town
State
Zip code

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.
I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits estabished for difficult compound.
‡	Wide RPD limits estabished for difficult compound.
#	Data exceeded client recommended or regulatory level

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

Sample Receipt Checklist

CLIENT NAME: JME RECEIVED BY: CEC DATE: 5/26/09

1) Was the chain(s) of custody relinquished and signed? Yes No

2) Does the chain agree with the samples? Yes No

If not, explain:

3) Are all the samples in good condition? Yes No

If not, explain:

4) How were the samples received:

On Ice ☑ Direct from Sampling ☐ Ambient ☐ In Cooler(s) ☑

Were the samples received in Temperature Compliance of (2-6°C)? Yes No

Temperature °C by Temp blank 3.0 Temperature °C by Temp gun _____

5) Are there Dissolved samples for the lab to filter? Yes No

Who was notified _____ Date _____ Time _____

6) Are there any samples "On Hold"? Yes No Stored where: _____

7) Are there any RUSH or SHORT HOLDING TIME samples? Yes No

Who was notified _____ Date _____ Time _____

8) Location where samples are stored: 19

Permission to subcontract samples? Yes No
(Walk-in clients only) if not already approved

Client Signature: _____

Containers sent in to Con-Test

	# of containers		# of containers
1 Liter Amber		8 oz clear jar	
500 mL Amber		4 oz clear jar	
250 mL Amber (8oz amber)	5	2 oz clear jar	
1 Liter Plastic		Other glass jar	
500 mL Plastic		Plastic Bag / Ziploc	
250 mL plastic		Air Cassette	
40 mL Vial - type listed below		Brass Sleeves

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.
I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

Edward J. Denson

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits estabished for difficult compound.
‡	Wide RPD limits estabished for difficult compound.
#	Data exceeded client recommended or regulatory level

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

Sample Receipt Checklist

CLIENT NAME: JME RECEIVED BY: CEC DATE: 6/1/08

1) Was the chain(s) of custody relinquished and signed? Yes No

2) Does the chain agree with the samples? Yes No

If not, explain:

3) Are all the samples in good condition? Yes No

If not, explain:

4) How were the samples received:

On Ice ☑ Direct from Sampling ☐ Ambient ☐ In Cooler(s) ☑

Were the samples received in Temperature Compliance of (2-6°C)? Yes No

Temperature °C by Temp blank 3.0 Temperature °C by Temp gun _____

5) Are there Dissolved samples for the lab to filter? Yes No

Who was notified _____ Date _____ Time _____

6) Are there any samples "On Hold"? Yes No Stored where: _____

7) Are there any RUSH or SHORT HOLDING TIME samples? Yes No

Who was notified _____ Date _____ Time _____

8) Location where samples are stored: 19

Permission to subcontract samples? Yes No
(Walk-in clients only) if not already approved

Client Signature: _____

Containers sent in to Con-Test

	# of containers		# of containers
1 Liter Amber		8 oz ~~clear~~ amber jar	3
500 mL Amber		4 oz clear jar	
250 mL Amber (8oz amber)		2 oz clear jar	
1 Liter Plastic		Other glass jar	2
500 mL Plastic		Plastic Bag / Ziploc	
250 mL plastic		Air Cassette	
40 mL Vial - type listed below		Brass Sleeves	
Colisure / bacteria bottle		Tubes	
Dissolved Oxygen bottle		Summa Cans	
Flashpoint bottle		Regulators	
Encore		Other Tall 8oz Jar	5

Laboratory Comments:

40 mL vials: # HCl _____ # Methanol _____

Bisulfate _____ # DI Water _____ Time and Date Frozen: _____

Thiosulfate _____ Unpreserved _____

Do all samples have the proper pH: Yes No N/A

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.
I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits estabished for difficult compound.
‡	Wide RPD limits estabished for difficult compound.
#	Data exceeded client recommended or regulatory level

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

Sample Receipt Checklist

CLIENT NAME: JME RECEIVED BY: CEC DATE: 6/1/08

1) Was the chain(s) of custody relinquished and signed? Yes No

2) Does the chain agree with the samples? Yes No

If not, explain:

3) Are all the samples in good condition? Yes No

If not, explain:

4) How were the samples received:

On Ice ☑ Direct from Sampling ☐ Ambient ☐ In Cooler(s) ☑

Were the samples received in Temperature Compliance of (2-6°C)? Yes No

Temperature °C by Temp blank 3.2 Temperature °C by Temp gun _____

5) Are there Dissolved samples for the lab to filter? Yes No

Who was notified _____ Date _____ Time _____

6) Are there any samples "On Hold"? Yes No Stored where: _____

7) Are there any RUSH or SHORT HOLDING TIME samples? Yes No

Who was notified _____ Date _____ Time _____

8) Location where samples are stored: lg

Permission to subcontract samples? Yes No
(Walk-in clients only) if not already approved

Client Signature: _____

CASE NARRATIVE SUMMARY

All reported results are within defined laboratory quality control objectives unless listed below or otherwise qualified in this report.

The results of analyses reported only relate to samples submitted to the Con-Test Analytical Laboratory for testing.
I certify that the analyses listed above, unless specifically listed as subcontracted, if any, were performed under my direction according to the approved methodologies listed in this document, and that based upon my inquiry of those individuuals immediately responsible for obtaining the information, the material contained in this report is, to the best of my knowledge and belief, accurate and complete.

FLAG/QUALIFIER SUMMARY

*	QC result is outside of established limits.
†	Wide recovery limits estabished for difficult compound.
‡	Wide RPD limits estabished for difficult compound.
#	Data exceeded client recommended or regulatory level

Percent recoveries and relative percent differences (RPDs) are determined by the software using values in the calculation which have not been rounded.

Sample Receipt Checklist

CLIENT NAME: JME RECEIVED BY: CEC DATE: 5/26/08

1) Was the chain(s) of custody relinquished and signed? Yes No

2) Does the chain agree with the samples? Yes No

If not, explain:

3) Are all the samples in good condition? Yes No

If not, explain:

4) How were the samples received:

On Ice ☑ Direct from Sampling ☐ Ambient ☐ In Cooler(s) ☑

Were the samples received in Temperature Compliance of (2-6°C)? Yes No

Temperature °C by Temp blank 3.0 Temperature °C by Temp gun _____

5) Are there Dissolved samples for the lab to filter? Yes No

Who was notified _____ Date _____ Time _____

6) Are there any samples "On Hold"? Yes No Stored where: _____

7) Are there any RUSH or SHORT HOLDING TIME samples? Yes No

Who was notified _____ Date _____ Time _____

8) Location where samples are stored: 19

Permission to subcontract samples? Yes No
(Walk-in clients only) if not already approved

Client Signature: _____

Containers sent in to Con-Test

	# of containers		# of containers
1 Liter Amber		8 oz clear jar	
500 mL Amber		4 oz clear jar

Massachusetts Department of Environmental Protection
Bureau of Waste Prevention

Material Shipping Record & Log

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☐ operator

Tracking Number

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

B. Generator Information

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

#12824

Tracking Number

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Trans-Spec Truck Service — Name of organization

Bill Howard — Contact name

Title

7 Cristo Ln — Street address

Millbury — City/Town

MA — State

01527 — Zip code

Tracking Number

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 From — 7/31/09 To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Trans-Spec Truck Service — Name of organization

Bill Howard — Contact name

Title

7 Cristo Ln — Street address

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 (From) 7/31/09 (To)
3. U.S. EPA ID number: _____
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

T.S. Truck Services — Name of organization
Driver Lester — Title
Bill Howard — Contact name

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional): Former Keith Junior High School
Street: 70 Hathaway Boulevard
City/Town: New Bedford
State: Massachusetts
Zip code: 02740

2. Date/Period of generation: From 7/2/09 To 7/31/09
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0036 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

Name of organization: City of New Bedford
Contact name: William doCarmo
Title: Project Manager
Street address: 133 Williams Street
City/Town: New Bedford
State: Massachusetts
Zip code: 02740
Telephone number (including extension): 508-207-2255

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Name of organization: AGA

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 From — 7/31/09 To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Delivery # 14806
Stip. Signed

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 (From) 7/31/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number (including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Name of organization
T.S. Truck Services — Contact name
Title
7 CR — Street address
City/Town
State
Zip code
Telephone number
Ext.

Massachusetts Department of Environmental Protection
Bureau of Waste Prevention

Material Shipping Record & Log

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☒ operator

Diversified Developments Robert Andrade — Name of organization

Joe Lemieux — Contact name

OWNER — Title

383 Hixville Rd — Street address

Dartmouth — City/Town

MA — State

02747 — Zip code

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1 Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5 List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☐ operator

#56
Tracking Number

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 (From) 7/31/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number (including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☒ operator

T.S. Truck Service — Name of organization
Bill Howard — Contact name
Title
7 Christo Lane — Street address

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5 List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Tank Service — Name of organization
Contact name
Title
Milbury MA — Street address
Worcester — City/Town

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor – do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☑ operator

T.S. Truck Service — Name of organization

Bill Howard — Contact name

Title

7 Cristo Ln — Street address

Millbury — City/Town

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☐ operator

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/2/09 (From) 7/31/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

TRANS-SPEC TRUCK Service — Name of organization
Bill Howard — Contact name
Title
7 Cristo LN — Street address

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/8/09 — From; 8/6/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

AGA — Name of organization

GEORGE COELHO — Contact name

Title

96 Howard Av. — Street address

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☑ operator

STS TRUCKING — Name of organization
BRIAN SOUCY — Contact name
Title
17 BOW DRIVE — Street address

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Truck Service — Name of organization

Bill Howard — Contact name

Owner — Title

7 Cristo Lane — Street address

Millbury — City/Town

MA — State

01527 — Zip code

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To
3. U.S. EPA ID number: _____
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

#93 29595
Tracking Number

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

B. Generator Information

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☑ operator

Truck Service — Name of organization
Bill Howard — Contact name

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Truck service — Name of organization

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☑ operator

S+S TRUCKING — Name of organization

BRIAN SOUCY — Contact name

Title

17 BOW DRIVE — Street address

Acushnet — City/Town

MA — State

02743 — Zip code

508 326 5197 or 508 763-3309 — Telephone number

Material Shipping Record & Log

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☒ operator

Truck Service — Name of organization
Contact name
Title
Eshow W 7 Cristo Lane — Street address

Material Shipping Record & Log

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☑ operator

S & S TRUCKING — Name of organization

BRIAN SOUCY — Contact name

Title

17 BOW DRIVE — Street address

ACUSHNET — City/Town

MA. — State

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 (From) 8/6/09 (To)
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

B. Generator Information

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☑ operator

TRUCK - SERV — Name of organization
Bill Howard — Contact name
OWNER — Title
7 CRICTO LA — Street address

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☒ owner ☐ operator

C + B Trucking — Name of organization

Contact name

Title

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street
Former Keith Junior High School — Location aid
New Bedford — City/Town
Massachusetts — State
02740 — Zip code

2. Date/Period of generation: 7/6/09 — From; 8/6/09 — To
3. U.S. EPA ID number:
4. 21E release: ☐ Yes ☒ No
5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization
William doCarmo — Contact name
Project Manager — Title
133 Williams Street — Street address
New Bedford — City/Town
Massachusetts — State
02740 — Zip code
508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☐ owner ☐ operator

Truck Service — Name of organization
Contact name
Title
7 Cristo Lane — Street address
Millbury — City/Town

Material Shipping Record & Log

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0036 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

B. Generator Information

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☑ owner ☐ operator

For the shipment of contaminated soil, urban fill, and dredge materials not subject to management under section 310 CMR 40.0035 nor manifesting under 310 CMR 30.000

Tracking Number

A. Location Information

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

1. Provide the following information on the location where the waste was generated:

Release name (optional)

70 Hathaway Boulevard — Street

Former Keith Junior High School — Location aid

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

2. Date/Period of generation: 7/2/09 — From; 7/31/09 — To

3. U.S. EPA ID number:

4. 21E release: ☐ Yes ☒ No

5. List additional tracking documents associated with this document:

B. Generator Information

Important: This form is not to be used for the shipment of remediation wastes subject to management under section 310 CMR 40.0035 of the Massachusetts Contingency Plan nor is it to be used in lieu of a hazardous waste manifest for hazardous waste or recyclable materials subject to the Massachusetts Hazardous Waste Regulations 310 CMR 30.000.

1. Provide the following generator information:

City of New Bedford — Name of organization

William doCarmo — Contact name

Project Manager — Title

133 Williams Street — Street address

New Bedford — City/Town

Massachusetts — State

02740 — Zip code

508-207-2255 — Telephone number(including extension)

C. Owner and/or Operator Information

1. If the owner and/or operator is different from the generator as indicated in Section B, provide the following information:

Check applicable: ☒ owner ☐ operator

CTB Trucking — Name of organization

Bob — Contact name

Title

6 Cedar Lane — Street address

West Port — City/Town

TRC Reference No. 115058

June 26, 2009

Molly Cote
Massachusetts Department of Environmental Protection
Southeast Regional Main Office
20 Riverside Drive
Lakeville, Massachusetts 02347

RE: Data in Support of "Like-Site" Soil Management Approach
Former Keith Junior High School/New Andre McCoy Field
New Bedford, Massachusetts

Dear Ms. Cote:

As discussed during our recent (June 5, 2009) teleconference regarding the above-mentioned project location at the former Keith Junior High School (KJHS), TRC Environmental Corporation (TRC) has prepared this letter to summarize and discuss all soil analytical data collected in support of a "like-site" management approach for excess project soil. At the time of the June 5, 2009 teleconference TRC was not in possession of all the soil analytical data, a portion of which was still undergoing analysis at the laboratory. This transmittal provides the complete data set generated to support the "like-site" approach.

Background. The construction contractor (David W. White) for the New Andre McCoy Field at the former KJHS is interested in finding a "like-site" for excess project soil. The Soil and Groundwater Management Plan (SGMP) prepared for the project by TRC indicates the subject soil is eligible for re-use at the KJHS project location. (The SGMP is included as Appendix G in TRC's April 2009 Release Abatement Measure Plan.) Currently, the City of New Bedford's bid specifications require that any excess project soil that would otherwise be eligible for on-site re-use must go off site to a landfill (daily cover/grading) unless otherwise approved by the LSP. David W. White estimates that approximately 40,000 cubic yards of excess soil will need to be managed for earthwork operations to reach proposed final grades for the New Andre McCoy Field.

The part of the site with the largest "cut" is Area 7, which has very little indication of contamination (please see Attachment A for a figure illustrating the location of Area 7), and as discussed during the June 5, 2009 teleconference is outside the footprint of the Parker Street Waste Site (PSWS). It is the soil from this portion of the project that are targeted for "like-site" reuse.

David W. White's environmental subcontractor JM Environmental (JME) has undertaken the following activities to properly manage material known to be impacted and to evaluate "like-site"

suitability of remaining material. JME proposes that any soil deemed eligible for a "like-site" soil management approach would only be used at commercial locations.

- **Segregation.** The following describes soil segregation efforts undertaken by David W. White and JME.

  Polychlorinated Biphenyl (PCB) Impacted Soil. JME reviewed the PCB data collected during previous environmental investigations at the former KJHS from within Areas 6 and 7 that are tabulated in TRC's April 2009 Release Abatement Measure Plan. Based on this review, JME instructed the field crews to segregate these soil areas for onsite re-use. Five PCB results were reported in Areas 6 and 7, which are listed below:

  - SS-5 (0-6") – 0.0541 mg/kg
  - SS-6 (0-6") – 0.0674 mg/kg
  - TP-6 (8-9') – 0.020 mg/kg
  - TP-11 (8-9') – 1.045 mg/kg
  - SB11 (0-6") – 0.90 mg/kg

  Although no PCBs were detected at the KJHS site above Massachusetts Contingency Plan (MCP) Method 1 S-1 soil cleanup standards, no Massachusetts Department of Environmental Protection (MassDEP) identified natural soil background levels has been established for PCBs, thus the making the soils containing detectable concentrations of PCBs problematic for a "like-site" approach under the anti-degradation provisions of the MCP (310 CMR 40.0032(3)).

  The above summarized samples with PCB detections generally fall within close proximity to the delineated site cut-line (see figure in Attachment A). JME removed approximately 25 yards of material from each sample location where PCBs were detected at the depth the sample was collected. This material has been segregated for on-site use at KJHS only and will not be involved in any "like-site" transfer/off-site reuse.

  Metals and Polyaromatic Hydrocarbon (PAH) Impacted Soil. JME reviewed metals and PAH data from Areas 6 and 7 where existing grades will be lowered (cut) and determined that most detections of metals and PAHs were within the topsoil layer (0-1.75') and near the cutline (see figure in Attachment A). JME instructed field crews to remove the topsoil for approximately 30-feet on either side of the cutline to a depth of 2-feet. This material has been segregated for on-site use at KJHS only and will not be involved in any "like-site" transfer/off-site reuse.

- **Additional Data Collection to Support "Like-Site" Approach.** JME performed test pits and collected 26 soil samples in cut Areas 6 and 7 for PAHs, RCRA 8 metals, and PCB analysis from composite samples. JME proposes to use this data set to support "like-site" soil management planning. JME's sample analysis focused on the three broad contaminant groups of issue at the wider site (i.e., metals, PAHs, PCBs). The data collected from this effort are provided in Attachment B. The soil samples were collected from both the topsoil material as well as data from the underlying soil/fill from the cut areas.

- **Data Analysis.** As noted in TRC's e-mail message of May 20, 2009, JME originally proposed that if the data were below the established MassDEP identified natural soil background levels in soil for the particular chemical constituents then no testing would be required at the

potential offsite commercial location. The data collected by JME (and contained in Attachment B) are summarized below:

PCBs. All PCB results are non-detect, with the exception of one sample from Test Pit 6 (see Attachment C for figures illustrating JME's sampling locations). The PCB result from Test Pit 6 was 0.19 mg/kg, which is significantly less than the MCP Method 1 S-1 soil clean-up standards. Nonetheless, since no MassDEP identified natural soil background levels exist for PCBs, JME will segregate Test Pit 6 soil for reuse at the KJHS project site only. Test Pit 6 soil will not be involved in any "like-site" transfer/off-site reuse.

PAHs. Most of the PAH results are non-detect. In the few samples where PAHs detected in project soils targeted for off-site reuse, the concentrations were well below MassDEP identified natural soil background levels.

Metals. Most of the metals detected in the JME dataset were at concentrations below MassDEP identified natural soil background levels. All metals results were well below the most stringent MCP Method 1 S-1 soil cleanup standards, regardless of groundwater category.

- Lead was detected in 23 out of 26 JME soil samples, with detected concentrations ranging from 0.89 to 130 mg/kg (average detected concentration 26.8 mg/kg). The MassDEP identified natural soil background level for lead is 100 mg/kg.

- Several detections of lead and one of silver were reported at concentrations slightly higher than MassDEP identified natural soil background levels (100 mg/kg for lead). However, all metals that were detected (including the lead) were reported at concentrations well below the most stringent Method 1 S-1 soil cleanup standards.

- Silver was detected in one sample at a concentration of 0.9 mg/kg, which is just over the natural soil background of 0.6 mg/kg.

- Both lead and silver were present at concentrations well below their respective Method 1 S-1 soil cleanup standards of 300 mg/kg and 100 mg/kg.

- **Path Forward.** JME is currently evaluating five locations for use of the excess soil. As noted above, JME has stated that the above-described excess soil from this site would only be reused at a commercial site. As discussed during the June 5, 2009 teleconference, the areas of soil involved are to the west of the contaminated fill line delineated by TRC on the KJHS parcel (see Attachment A), are outside the footprint of the Parker Street Waste Site (PSWS), and are not regulated soil (no detections above reporting or cleanup criteria). In addition, the majority of the results are well below MassDEP identified natural soil background levels based on maximum detected values, and all are well below natural soil background based on average concentrations.

  When JME identifies the proposed commercial locations where excess soil from the project is proposed for use, MassDEP will be apprised in writing before soil transfer commences. All soil transfers will be tracked via Material Shipping Records (MSRs). MassDEP will be provided copies of all completed MSR transactions.

In addition, the City will require a written acknowledgement from the owners of the commercial locations to which the soil will be transferred, and from the David W. White explicitly stating the following:

- From the Accepting Facility:

_____ agrees to accept excess project soil from the former Keith Jr. High School/ New Andre McCoy Field site (the Soil) located at _____ Hathaway Boulevard in New Bedford, Massachusetts. _____ agrees that it has received and reviewed the analytical data associated with the Soil. Based on _____'s review of this data, _____ determines that importation of the Soil will not trigger regulatory reporting requirements, is consistent with background levels at the location where reuse will occur, and does not violate applicable Massachusetts Contingency Plan anti-degradation requirements under 310 CMR 40.0032(3). _____ shall use the Soil only as sub-grade fill material and only on commercial sites. _____ shall accept the material via a Materials Shipping Record. _____shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

- From the David W. White (the general contractor):

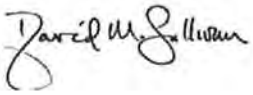
David W. White and Son, Inc. (the Contractor) agrees to manage excess project soil from the Keith Jr. High School/ New Andre McCoy Field site (the Soil) located at _____ Hathaway Boulevard in New Bedford, Massachusetts in accordance with the letter dated June _____, 2009 from TRC (Attachment 1). The Contractor shall comply with all terms and conditions of the letter and any additional terms and conditions imposed by the Massachusetts Department of Environmental Protection (MassDEP) with respect to the management of the Soil. The Contractor agrees that the management of the Soil is at its sole risk and shall indemnify and hold the City of New Bedford harmless from any and all claims related to disposition and reuse of the Soil.

The expeditious removal of the excess soil is important to the success of this project, given the aggressive project schedule agreed to with the City by David W. White. MassDEP will be notified as soon as possible when off-site transport of excess soil is proposed.

Please do not hesitate to contact me at TRC at 978-656-3565 or via e-mail at dsullivan@trcsolutions.com if you have any questions or comments.

Sincerely,

TRC Environmental Corporation



David M. Sullivan, LSP, CHMM
Senior Project Manager
