Subject: Notice of Intent for the former Aerovox site

Dear Conservation Commission:

MassDEP has been informed that Brown & Caldwell, on behalf of AVX Corporation, has submitted a Notice of Intent to the New Bedford Conservation Commission to initiate remedial activities near the shoreline at the former Aerovox facility (Site) on Belleville Avenue. These activities are part of a pilot test for a full scale remedy in order to remediate the PCB and TCE contamination documented at the Site.

These activities are required under 310 CMR 40.0000, the regulations that govern the cleanup of disposal sites in Massachusetts. AVX has been working closely with MassDEP to ensure that the proposed remediation is compliant with regulations and protective of the environment and human health. The results of this pilot test will provide the necessary information to implement the full scale remedy in the near future.

Please feel free to contact me if you have any questions.

Take care,
Angela Gallagher
