CITY OF NEW BEDFORD **Jonathan F. Mitchell, Mayor**

July 9, 2015

John Radcliffe, Chairman
Conservation Commission
133 William Street Room 304
New Bedford MA 02740

Dear Mr. Chairman, Commission Members, and Conservation Agent,

This cover letter accompanies the revised Notice of Intent with DPI as the applicant for constructing a new municipal salt shed on a City owned parcel off the south side of Jones Street namely Map 123 Lot 139. The submission has been revised but remains incomplete in that the topographic survey has not been completed and abutters have not been notified. The remaining wetland flags have been posted and located by instrument survey, a draft storm-water report has been presented and the proper number of signed copies of documents submitted. The subject area encompassing this project is outside the estimated habitat of an endangered species depicted further north.

DPI requests New Bedford Conservation Commission review of this submission seeking preliminary recommendations for development before further effort is expended on this particular site. If you have any questions concerning this submission please feel free to contact me at 508 979-1550 x128.

Respectfully submitted,

David Fredette
City Engineer

CC: Ronald Labelle, Commissioner
